4. Objectives

Wolf Steel Limited is committed to playing a leadership role in protecting the environment. While no options have been identified, as part of the continuous improvement practices at the facility, technical advances will be monitored for new opportunities to reduce the concentration levels at the facility.

Wolf Steel will continue to use these substances in strict accordance with all applicable environmental regulations

5. Progress in Implementing Plan

This section does not apply since no feasible reduction options have been identified for implementation at this time. Wolf Steel Limited's commitment to continuous improvement has resulted in an extraordinary lean and efficient manufacturing facility. The facilities' continuous improvement measures, couple with the acknowledgment that consumer demand drives the specifications for parts produced at the site mean that there are no additional options for the facility to implement. However, the facility will continue to make improvements to processes and programs when feasible.

For information on on-site releases from the facility, as well as disposal and off-site recycling information, please refer to National Pollutant Release Inventory's website: <u>http://www.ec.gc.ca/inrp-npri/.</u>

As of 06/01/2016, I, <u>Ralf Zimmer</u>, certify that I have read the reports on the toxic substance reduction plans for the toxic substances referred to below and am familiar with their contents, and to my knowledge the information contained in the reports is factually accurate and the reports comply with the Toxics Reduction Act, 2009 and Ontario Regulation 455/09 (General) made under that Act.
